

REPLENISHMENT OPTIMIZATION

Customer demand meets profitable inventory investment

PRECISE INVENTORY REPLENISHMENT PLANNING FOR RAPID, BOTTOM-LINE RESULTS.

Accurate inventory planning means millions more in your pocket.

To get exceptional bottom-line results, you need to precisely align inventory with demand at every location. Only Blue Ridge automatically considers every relevant business constraint to provide the most realistic visibility to future inventory orders and cash requirements.

Considering unique factors such as supplier capacity, order minimums, location-specific inventory levels, order schedules, and more, Blue Ridge plans your inventory orders down to the day in the most economical way possible.

We build and optimize. You grow sales and profit.

Certain things technology does better, complex economic optimization of inventory orders. Technology that builds orders up to 365 days in advance and considers unique details like your supplier's ability to fulfill future orders. Other things humans do much better, such as strategic category management decisions, negotiating with suppliers for better margin, and deciding when to launch a promotion to drive incremental revenue.

Blue Ridge completely automates inventory order planning, with our replenishment solutions and software, freeing you and your team to focus on what's most important- driving sales and realizing more profit.
